

What I heard from you

- ✓ Right now everything runs through your phone and a Google Sheet
- ✓ You want a simple site: a home page, a page to meet the tutors, and a way to book
- ✓ Each tutor should show their photo, subjects, grade levels, rate, and real availability
- ✓ Booking should just ask for the parent's name and email, and the student's name, grade, and subject
- ✓ The calendar has to show each tutor's actual free times – not a generic 9-to-5
- ✓ It needs to feel clean and friendly on a phone – not dark, not corporate, not a big test-prep chain

Your website

ABC ABC Tutoring

[Home](#)[Our Tutors](#)[Book a Session](#)

IN PERSON & ONLINE

Tutoring that fits your family's week.

We're a local tutoring service in the suburb. Pick a tutor you like, choose a time that actually works, and book it in about a minute – no phone tag.

[See our tutors](#)[Book a session](#)

How it works

Three steps, all from your phone.

1

Browse tutors

See each tutor's subjects, grade levels, hourly rate, and the times they're actually free.

2

Pick a real time slot

You only ever see openings that are genuinely available. Sessions run one hour.

Home – a warm welcome and a clear next step

ABC ABC Tutoring

[Home](#)[Our Tutors](#)[Book a Session](#)

Our tutors

Six tutors covering math, science, and reading. Times shown are real openings in the next three weeks.

Note for Dana: these are sample profiles. Replace them in `data/tutors.js` and this page updates itself.

Book a session – one short form, done in about a minute

How a parent books

1

Pick a tutor

See their subjects, rate, and photo

2

Pick an open time slot

Only real, available times are ever shown

3

Fill in one short form

Parent and student details – nothing more

4

Get an instant confirmation

That slot closes automatically, so nobody double-books it

Start to finish: about a minute. No phone tag.

The screenshot shows the 'Book a session' page for ABC Tutoring. At the top, there's a navigation bar with 'Home', 'Our Tutors', and 'Book a Session'. Below the header, the title 'Book a session' is followed by a subtext: 'Pick a tutor, choose an open time, and tell us about your student. Sessions are one hour.' The main form is divided into two sections. The first section, '1. CHOOSE A TUTOR', features a dropdown menu currently showing 'Maya R. - Elementary Math, Pre-Algebra (\$45/hr)'. Below this, a small profile card for 'Maya R.' is visible, showing 'Grades 2nd-7th · \$45/hour · Both'. The second section, '2. CHOOSE AN OPEN TIME', displays a list of available time slots for various dates: Tuesday, Sep 8 (4pm-5pm); Thursday, Sep 10 (4pm-5pm); Saturday, Sep 12 (9am-10am); Tuesday, Sep 15 (4pm-5pm); Thursday, Sep 17 (4pm-5pm); and Saturday, Sep 19 (9am-10am).

The screenshot shows the confirmation page after a session has been booked. At the top, there's a green checkmark icon and the text 'You're booked, Jane.' Below this, a message states: 'We've saved this session and that time slot is now closed to everyone else. A confirmation will go to jane@email.com.' A table summarizes the booking details: Tutor (Maya R.), When (Tue, Sep 8 at 4pm), Student (Sam - 4th grade), Subject (Elementary Math), Session (1 hour - Both), and Rate (\$45). At the bottom of the table is a 'Book another session' button. The footer of the page includes the text: 'ABC Tutoring - local tutoring in our suburbs, in person and online. Elementary math through Algebra II · Science · Elementary reading'.

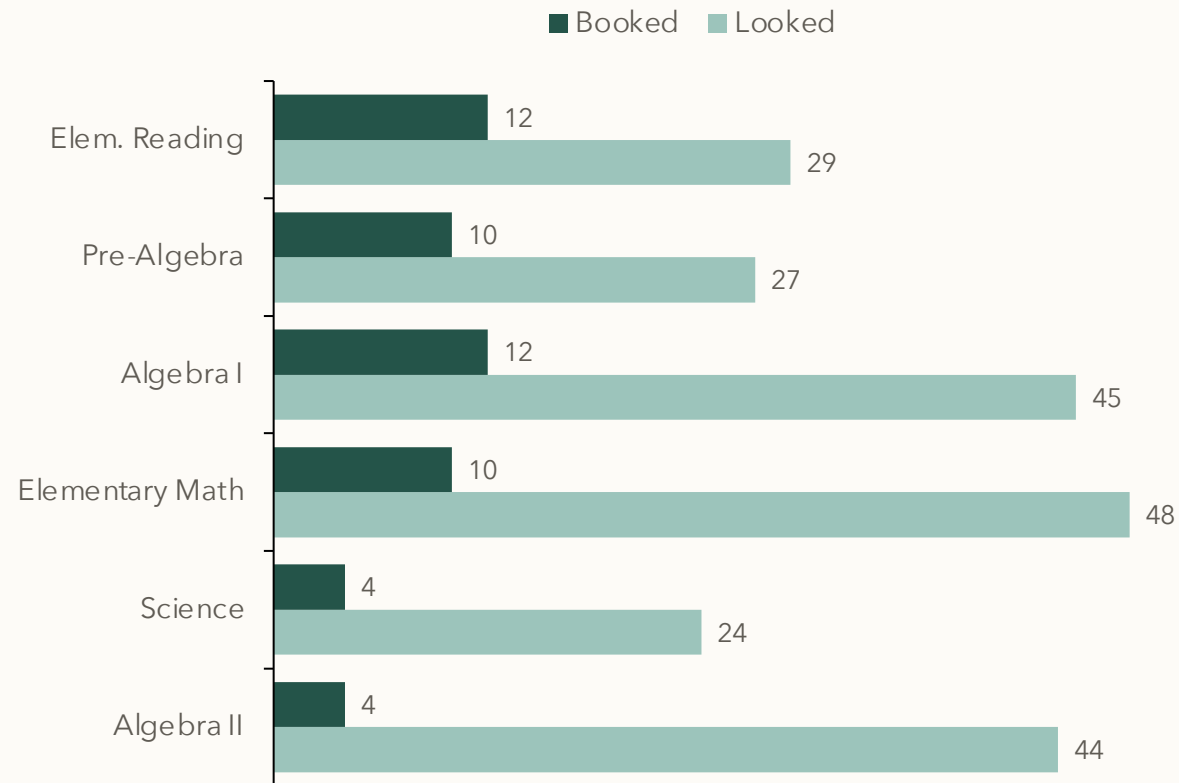

What you can now see about your visitors

A suggestion from me: here are the four things I'd watch, and what each one is worth to you.

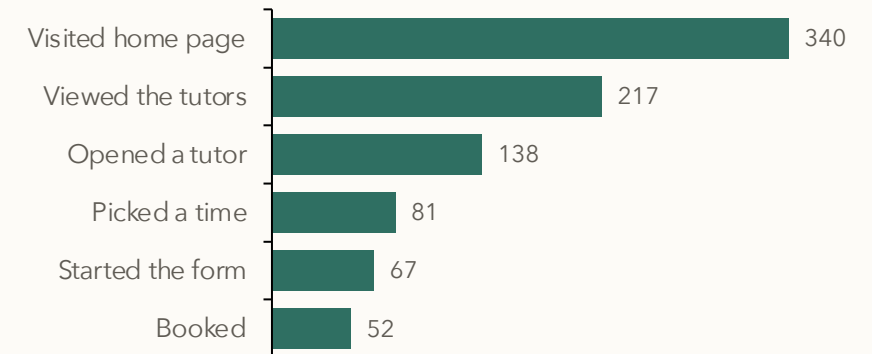

44 parents came looking for Algebra II help. Only 4 could book. 10 found no open times.

One tutor covers Algebra II with 2 hours a week. Compare Elementary Reading, which books at 41% because that tutor has hours to spare.

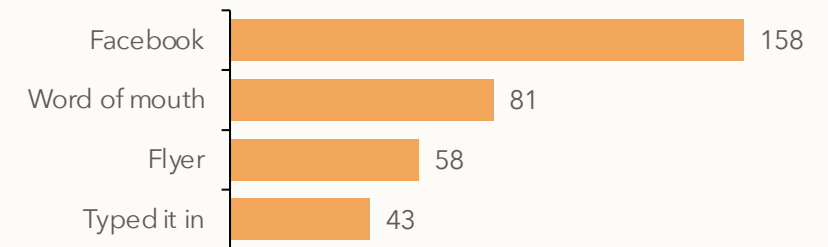

Looked vs. booked, by subject

From visit to booking

How parents found you

69% of parents visited on a phone (233 of 340)

What I need from you

To replace the sample tutors

- Real names, photos, subjects, and grade levels for your 6 tutors
- Each tutor's hourly rate
- Each tutor's real weekly availability (the times shown now are placeholders)

All of this lives in a single file – once you send it over, it's a quick swap. No rebuilding the site.

Coming next (not built yet)

- A simple screen where you can add or remove tutors yourself
- A shared calendar so bookings stay in sync across every device
- Automatic email confirmations to parents
- Invoicing
